Direct funding in Working Groups

Where are we? (My view)

- ❖ KERI Suite standardization documents
- ❖ KERI Suite code
- ❖ KERI is not completely ready -> funding in entity!
- ❖ DICE 2024
- ❖ First Zoom session:
 -
 - domicile should be the result of design
 - Sam Smith should be BDFL
- ❖ Charter Stephan
- ❖ HackMD design Henk + website
- ❖ Second Zoom session
- ❖ Evaluation domicile foundation

Design principles

- Minimally sufficient means. In a way that people can use KERI without understanding and pay for it "as you go"
- Reduce complications for developers, implementers, and users of the KERI Suite in that order.
- A lead role for KERI inventor and lead-developer Dr. Samuel M. Smith
- A role-based organization model that anticipates international growth but can act small
- A balanced and transparent decision-making process that involves key stakeholders
- Smaller autonomous cells to work on delegated objectives; directed funding.
- Improve and maintain the open source code base. (Find funds to) Manage the open source development of the KERI Suite based on its standards documents and put it in a broad perspective.

Criteria domicile

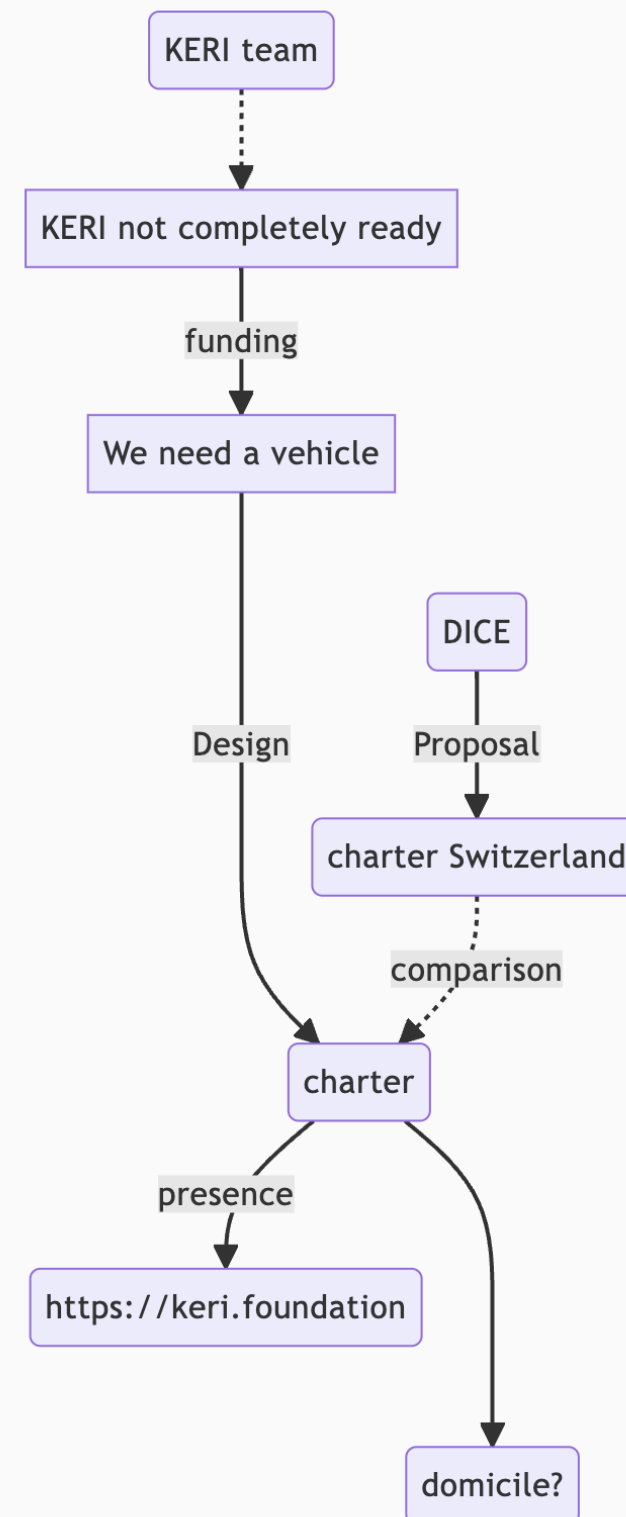

| Aspect | KERI | Foundation | Sam |
|---|---------------------------------|-------------------|-------------------------|
| cost and tax-efficient solution | lots 2 devs | structural costs | preferable; lots 2 devs |
| neutral and reputable image | medium importance | important | medium important |
| uncomplicated | Practise what you preach | less governance | preference |
| native English language in the jurisdiction at hand | important | important | important |
| remotely manageable and US time zone friendly | git, github, developer friendly | virtual org | preferable |
| regulatory complexity | less important | medium importance | likes a low complexity |

Score card domicile

| Aspect | Ireland | Scotland | Switzerland | US |
|---|---------|----------|-------------|------|
| cost and tax-efficient solution | +++ | ++++ | - | + |
| neutral and reputable image | +++ | +++ | ++++ | ++ |
| uncomplicated | ++ | +++ | + | ++ |
| native English language in the jurisdiction at hand | ++++ | ++++ | - | ++++ |
| remotely manageable and US time zone friendly | ++++ | +++ | ++ | ++++ |
| regulatory complexity | ++ | ++ | +++ | +++ |
